CONDITIONS: Given a standard 1:50,000-scale military map.

STANDARDS: Identify the five major and three minor features on the map.

PERFORMANCE STEPS

1. Identify terrain features in Table 071-329-1001 the same way on all maps, regardless of the contour interval. Keep in mind that a hill in the Rocky Mountains will be much bigger than the one in South Florida. You must be able to recognize all the terrain features to locate a point on the ground or to navigate from one point to another (Figures 01 through 02).

**Figure 01.** Using fist to explain terrain features.

**Figure 02.** Using hand to explain terrain feature.
**EVALUATION PREPARATION:** SETUP: Use a 1:50,000-scale military map. Circle one example of each major terrain feature and one example of each minor terrain feature. Randomly number the circled terrain features 1 through 8. Provide each Soldier with duplicate sets of the map, paper, and two pencils.

**BRIEF SOLDIER:** Tell the Soldier to number the paper 1 through 8. Tell the Soldier to write down the terrain feature that corresponds to each circled area on the map.
